

Trade Program

For sauna builders, contractors, designers, and gym, spa and hotel projects.

1 What a trade account gets you

- **Project pricing** on heaters, controls, steam generators, cold plunge and accessories.
- **Spec help:** heater size, control, electrical draw and clearances checked against your room drawings, with the manufacturer manual for your electrician.
- **Complete kits:** heater, control and the right stone count quoted as one line, so nothing is missing on install day.
- **One freight plan** for multi-room or multi-site jobs, delivered to your schedule.
- **One contact** for quotes, orders, freight claims and warranty questions.

2 How a project runs

1. Send the room sizes or drawings, wall materials, voltage and ZIP code.
2. We reply within one business day with the spec, the kit and a delivered price.
3. You approve; we place the order and book freight to your site.
4. We track it to delivery and help with any freight or warranty claims.

3 Join the installer network

Many of our homeowner customers need a local installer. Network members get paid installation work from our customers in their area, under a written installer agreement. Apply at saunaemporium.com/installers.

4 What we supply
